EDUCATION

Chapman University

Orange, California

M.S. in Electrical Engineering and Computer Science

Graduated: May 2026

- **GPA:** 3.97
- **Related Coursework:** Statistical Machine Learning, Computer Graphics, Adv Artificial Intelligence, High-Performance Computing, Text Mining & Natural Language Processing, Times Series Analysis

B.S. in Computer Science; Minor in Game Development Programming

Graduated: May 2024

- **GPA:** 3.82, Provost's List, Magna Cum Laude
- **Related Coursework:** Database Management, Operating Systems, Algorithm Analysis, Computer Architecture, Computer Networks, Human Computer Interaction, Digital Logic, Data Structures, Linear Algebra

EXPERIENCE

Panasonic Avionics Corporation

Irvine, California

Software Engineering Intern (Test Automation)

May 2025 – May 2026

- Contributed to automation frameworks, test infrastructure, and CI/CD stability efforts for airline in-flight entertainment and seatback systems.
- Refactored and improved 100+ automation scripts and participated in 60+ code reviews to increase maintainability, scalability, and execution stability across multiple airline frameworks.
- Collaborated in Agile development while leveraging Git/GitLab workflows for code integration, version control, and subtree/submodule management across 6+ shared repositories.

Fowler School of Engineering, Chapman University

Orange, California

Graduate Student Instructor

August 2024 – January 2026

- Guided 90+ students across 4 sections in learning foundational Python skills and applying critical thinking skills to programming through lectures, assignments, and other instructional materials.
- Collaborated with faculty to align course content and ensure consistency in expectations across sections.

Graduate Teaching Assistant

August 2025 – December 2025

- Graded assignments, quizzes, and exams for 20+ students while providing support through office hours and feedback.

SKILLS

Languages: Python, C#, C++, Java, R, C, HTML/CSS, JavaScript, Swift

Tools & Platforms: Git, GitHub, GitLab CI/CD, Jira/Confluence, Linux/Unix, Docker, Linters, PyTorch, Pandas, Matplotlib, Unity, Unreal Engine, Plastic SCM (Unity DevOps), Pytest, Selenium/Appium/Squish

PROJECTS

In the Pipes | *Unity, C#, Agile Development, Game Design* | [See More](#)

- Collaborated on a team-developed 2D platformer video game where players navigate through the sewers as Sam the Spider. *Contributions:* Spider Movement, Enemy Behavior, Level/UI Design, Art & Sounds, Project Management

Parallelized Boid Simulation | *C++, OpenMP, MPI* | [See More](#)

- Developed a parallel implementation of the Boids flocking algorithm to simulate large-scale agent interactions.
- Optimized compute-intensive neighbor-search and update operations through distributed and shared-memory parallelism, evaluating scalability and performance across varying workloads.

The RL Castle | *Python, Reinforcement Learning, AI, Simulation* | [See More](#)

- Built an interactive RL simulator that visualizes agent training, policy development, and decision-making within customizable game environments.

OC Restaurant Vibe Classifier | *Python, NLP, Hugging Face, Transformers* | [See More](#)

- Fine-tuned and evaluated a transformer-based NLP model to classify restaurant reviews into vibe categories using custom preprocessing, supervised learning, and a 2,000-sample, balanced and labeled, Yelp review dataset.

ACTIVITIES AND LEADERSHIP

Delta Delta Delta VP Operations, DEIAB Committee Co-Chair

January 2021 – May 2024

- Managed chapter operations, finances, and a \$100K+ budget while supporting 100+ members and 19+ officers.
- Led officer onboarding, executive committee initiatives, and coordination with national organization representatives.
